Biosynthesis and Degradation

Characteristics of mitochondrial and microsomal monoacyl- and diacyl-glycerol 3-phosphate biosynthesis in rabbit heart.
By M.-S. Liu & K. J. Kako 11

The enzymic and non-enzymic degradation of colneleic acid, an unsaturated fatty acid ether intermediate in the lipoxygenase pathway of linoleic acid oxidation in potato (*Solanum tuberosum*) tubers.
By T. Galliard, D. A. Wardale & J. A. Matthew 23

Catalysis of pentose phosphate pathway reactions by cytoplasmic fractions from muscle, uterus and liver of the rat, and the presence of a reduced nicotinamide–adenine dinucleotide phosphate–triose phosphate oxidoreductase in rat muscle.
By T. Wood 71

Metabolism of two adrenocorticotrophin analogues in the intestine of the rat.
By P. J. Lowry & C. McMartin 87

Bioenergetics

Calcium transport in the early conceptus and associated maternal tissues in the rabbit.
By J. E. A. McIntosh & C. Lutwak-Mann 97

Studies with a reconstituted muscle glycolytic system. The anaerobic glycolytic response to simulated tetanic contraction.
By R. K. Scopes 119

Subcellular Structures

Oxidation of formate by peroxisomes and mitochondria from spinach leaves.
By B. Halliwell 77

PAGE

Cellular Interactions and Control Processes

Regulation of glucose and ketone-body metabolism in brain of anaesthetized rats.
By N. B. Ruderman, P. S. Ross, M. Berger & M. N. Goodman 1

The pancreatic β-cell recognition of insulin secretagogues. Effects of calcium and sodium on glucose metabolism and insulin release.
By B. Hellman, L.-Å. Idahl, Å. Lernmark, J. Sehlin & I.-B. Täljedal 33

Enhanced phosphatidylinositol labelling in rat parotid fragments exposed to α-adrenergic stimulation.
By R. H. Michell & L. M. Jones 47

Experimental diabetic ketoacidosis. Sequential changes of metabolic intermediates in blood, liver, cerebrospinal fluid and brain after acute insulin deprivation in the streptozotocin-diabetic rat.
By P. J. Blackshear & K. G. M. M. Alberti 107

Metabolism in Whole Organisms

Chemically defined inducers of alkylsulphatases present in *Pseudomonas* C12B.
By K. S. Dodgson, J. W. Fitzgerald & W. J. Payne 53

Induction of primary alkylsulphatases and metabolism of sodium hexan-1-yl sulphate by *Pseudomonas* C12B.
By J. W. Fitzgerald, K. S. Dodgson & W. J. Payne 63

General Methods

Weighting functions and data truncation in the fitting of multi-exponential functions (*Short Communication*).
By G. L. Atkins 125

Contents of Volume 138, No. 2

PAGE

Biosynthesis and Degradation

Fate of corticotrophins in an isolated adrenal-cell bioassay and decrease of peptide breakdown by cell purification.
By H. P. J. Bennett, G. Bullock, P. J. Lowry, C. McMartin & J. Peters 185

Citrulline synthesis in rat tissues and liver content of carbamoyl phosphate and ornithine.
By L. Raijman 225

PAGE

Sterol biosynthesis in the free-living nematode *Panagrellus redivivus*.
By J. D. Willett & W. L. Downey 233

Isotope-dilution analysis of rate-limiting steps and pools affecting the incorporation of thymidine and deoxycytidine into cultured thymus cells.
By D. A. Sjostrom & D. R. Forsdyke 253

PAGE

Microbial metabolism of amino alcohols. Aminoacetone metabolism via 1-aminopropan-2-ol in *Pseudomonas* sp. N.C.I.B. 8858.
By A. Faulkner & J. M. Turner 263

Synthesis of radioactive dolichol from [4*S*-^{3}H]-mevalonate in the regenerating rat liver.
By H. G. Martin & K. J. I. Thorne 277

The involvement of endogenous dolichol in the formation of lipid-linked precursors of glycoprotein in rat liver.
By H. G. Martin & K. J. I. Thorne 281

Rat brain microsomal gangliosides. Accessibility to a neuraminidase preparation and the possible existence of different pools in relation to their biosynthesis.
By H. J. F. Maccioni, A. Arce, C. Landa & R. Caputto 291

Progesterone metabolism by the echinoderms *Asterias rubens* and *Marthasterias glacialis* (*Short Communication*).
By J. Gaffney & L. J. Goad 309

Bioenergetics

The inhibition of mitochondrial dicarboxylate transport by inorganic phosphate, some phosphate esters and some phosphonate compounds.
By R. N. Johnson & J. B. Chappell 171

The detection and characterization by electron-paramagnetic-resonance spectroscopy of iron–sulphur proteins and other electron-transport components in chromatophores from the purple bacterium *Chromatium*.
By M. C. W. Evans, A. V. Lord & S. G. Reeves 177

The development of cytochromes during the cell cycle of a glucose-repressed fission yeast, *Schizosaccharomyces pombe* 972h$^-$.
By R. K. Poole, D. Lloyd & B. Chance 201

Oxidative phosphorylation in *Escherichia coli* K12. An uncoupled mutant with altered membrane structure.
By G. B. Cox, F. Gibson & L. McCann 211

Accumulation of lanthanum by rat liver mitochondria.
By K. C. Reed & F. L. Bygrave 239

Subcellular Structures

Oxidative decarboxylation of glycollate and glyoxylate by leaf peroxisomes.
By B. Halliwell & V. S. Butt 217

PAGE

Fractionation of iodinated particles and mitochondria from thyroid by zonal centrifugation and a study of their heterogeneity.
By R. Miquelis & C. Simon 299

Contamination of free-ribosome fractions by detached previously membrane-bound ribosomes (*Short Communication*).
By K. O'Toole 305

Cellular Interactions and Control Processes

Inhibition of translation in liver polyribosomes by a new substituted thiopseudourea with antitumour action.
By N. F. González-Cadavid & F. H. Quijada 129

Induction of guanine deaminase and its inhibitor in rodent liver and brain.
By A. Sitaramayya, S. Ali, K. Sree Kumar & P. S. Krishnan 143

Influence of cholesteryl 14-methylhexadecanoate on some ribosomal functions required for peptide elongation.
By J. Hradec, Z. Dušek & O. Mach 147

The control of ribonucleic acid synthesis in bacteria. Fluctuations in messenger ribonucleic acid synthesis in cultures recovering from amino acid starvation.
By J. E. M. Midgley & R. J. Smith 155

A simple fluorimetric microassay for adenine compounds in platelets and plasma and its application to studies on the platelet release reaction.
By J. L. Gordon & A. H. Drummond 165

Specific inhibition of pyruvate transport in rat liver mitochondria and human erythrocytes by α-cyano-4-hydroxycinnamate (*Short Communication*).
By A. P. Halestrap & R. M. Denton 313

Effects of collagen and of aspirin on the concentration of guanosine 3′:5′-cyclic monophosphate in human blood platelets: measurement by a prelabelling technique (*Short Communication*).
By R. J. Haslam & M. D. McClenaghan 317

Development

A protein kinase inhibitor in brown adipose tissue of developing rats.
By J. P. Skala, G. I. Drummond & P. Hahn 195

PAGE

Biosynthesis and Degradation

The action of α-amanitin *in vivo* on the synthesis and maturation of mouse liver ribonucleic acids.
By A. A. Hadjiolov, M. D. Dabeva & V. V. Mackedonski 321

Metabolic adaptations during lactogenesis. Fatty acid synthesis in rabbit mammary tissue during pregnancy and lactation.
By R. W. Mellenberger & D. E. Bauman 373

3-*O*-Hydrosulphato-4-hydroxyphenethylamine (dopamine 3-*O*-sulphate), a metabolite involved in the sclerotization of insect cuticle.
By R. P. Bodnaryk & P. C. J. Brunet 463

Formation of acetoacetate from 3-hydroxy-3-methylglutarate by rat liver and isolation of a mitochondrial coenzyme A-transferase activity involved.
By R. Deana, R. Meneghello, L. Manzi & C. Gregolin 481

Half-life and rate of synthesis of globin messenger ribonucleic acid. Determination of half-life of messenger ribonucleic acid and its relative synthetic rate in erythroid cells.
By J. A. Hunt 487

Rate of synthesis and half-life of globin messenger ribonucleic acid. Rate of synthesis of globin messenger ribonucleic acid calculated from data of cell haemoglobin content.
By J. A. Hunt 499

Simulation of the pentose cycle in lactating rat mammary gland.
By M. J. Haut, J. W. London & D. Garfinkel 511

Teichoic acid synthesis in *Bacillus stearothermophilus*.
By L. D. Kennedy 525

Bioenergetics

The action of trialkyltin compounds on mitochondrial respiration. The effect of pH.
By A. P. Dawson & M. J. Selwyn 349

The effects of acetylcolletotrichin on the mitochondrial respiratory chain.
By B. Foucher, J. B. Chappell & J. D. McGivan 415

The partial characterization of purified nitrite reductase and hydroxylamine oxidase from *Nitrosomonas europaea*.
By G. A. F. Ritchie & D. J. D. Nicholas 471

Subcellular Structures

Rabbit β-glucuronidase. Purification and properties, and the existence of multiple forms.
By R. T. Dean 395

PAGE

Rabbit β-glucuronidase. Subcellular distribution and immunochemical properties.
By R. T. Dean 407

Cellular Interactions and Control Processes

Anti-anabolic effects of adenosine 3′:5′-cyclic monophosphate. Inhibition of protein synthesis.
By A. Sellers, D. P. Bloxham, K. A. Munday & M. Akhtar 335

Nitrogen metabolism in the isolated perfused rat liver. Nitrogen balance, redox state and rates of proteolysis.
By R. Parrilla & M. N. Goodman 341

The distribution of blood-group antigens on butanol extraction of human erythrocyte 'ghosts'.
By D. J. Anstee & M. J. A. Tanner 381

3-Mercaptopicolinic acid, an inhibitor of gluconeogenesis.
By N. W. Ditullio, C. E. Berkoff, B. Blank, V. Kostos, E. J. Stack & H. L. Saunders 387

Regulation of the pentose phosphate cycle.
By L. V. Eggleston & H. A. Krebs 425

Biochemical effects of diquat and paraquat. Disturbance of the control of corticosteroid synthesis in rat adrenal and subsequent effects on the control of liver glycogen utilization.
By M. S. Rose, H. C. Crabtree, K. Fletcher & I. Wyatt 437

Guinea-pig liver tryptophan pyrrolase. Absence of detectable apoenzyme activity and of hormonal induction by cortisol and possible regulation by tryptophan.
By A. A.-B. Badawy & M. Evans 445

Mechanisms for the formation of alanine and aspartate on rat liver *in vivo* after administration of ammonium chloride.
By J. T. Brosnan & D. H. Williamson 453

Regulation of hexose phosphate metabolism in *Acetobacter xylinum*.
By H. Weinhouse & M. Benziman 537

Development

Changes in free and membrane-bound ribosomes during the development of chick liver. A new cell-fractionation approach.
By K. O'Toole & J. K. Pollak 359

Index 543
